

We have vacancies for the following:-

## **Civil Technicians**

We are a successful innovative general practice dealing with varying sized projects from minor building works up to multi million pound projects, both in the UK and abroad, covering the design/detailing for the Civil and Structural Engineering works from concept to completion.

The Technicians should be flexible and enthusiastic they require having a good knowledge of all construction materials, be good communicators and team players.

We utilise the latest forms of hardware and specialist software including AutoCAD, Civils, PDS Ground Modeler, Windes/Micro drainage and, with the majority of design and detail being carried out in a 3D format, a good working knowledge and an understanding of these packages would be advantageous

Employees are encouraged and supported to further their education and training so as to advance in their career; this includes training in specialist software, however some basic knowledge would be advantageous, the company will cover these costs and time where applicable.

The remuneration package is negotiable which includes Health Insurance and is dependent upon experience and suitability. There are good opportunities for advancement within the practice.

Please apply by email or in writing to the address as detailed below for the attention of John W Blackhall C Eng MStructE MICE MCIHT FIMS
